## Summary

This course will review the importance of socket preservation and its applications. The procedure is one which can be applicable not only for implant placement but prosthetic consideration for fixed partial dentures and denture fabrication. A review of its efficacy, bone graft options, membrane options, instrumentation and suture types will be reviewed. Tips and tricks will be provided to aid in its implementation into your practice, giving you the ability to provide the best care for your patients. A hands-on model segment will be included to allow you to practice this procedure.

## Course Objectives

- Assess the purpose of socket preservation
- Review literature of its efficacy
- Explain bone graft options
- Review membrane options
- Tips and tricks and how to make it an easy addition to your practice
- Review post operative consideration
- Healing time guidelines

Presented by

**Robert Reti**

DDS, FACS, FICD, FACD

Oral and Maxillofacial Surgeon

Southwest Oral Surgery and Dental Implants

*Dr. Reti completed his general surgery and Oral & Maxillofacial surgery training at Tufts Medical Center in 2013, a pediatric and adult trauma level 1 hospital in Boston. During this time he was the Division I representative for the Resident Committee of the Academy of Oral & Maxillofacial Surgery. After completing his residency in 2013 Dr. Reti was selected for an advanced fellowship in Oral & Maxillofacial Surgery at Mercy Hospital in St. Louis, where he trained with some of the cities most respected facial cosmetic, maxillofacial and oculoplasty surgeons. It was during this time he was able to hone his advanced skills in dental implantology, TMJ disorders, bone grafting, facial trauma, obstructive sleep apnea and facial cosmetic surgery. Dr. Reti is a clinical instructor of Oral and Maxillofacial surgery at ATSU school of dental medicine, clinical instructor of plastic and reconstructive surgery at Washington University school of Medicine and Division Chief of Oral and Maxillofacial Surgery at Mercy South Hospital.*
